

We lately celebrated the 1000<sup>th</sup> issue of the Club Newsletter. It should not hold back what comes next: the 10<sup>th</sup> year anniversary of a new version of this Letter, with the addition of colours and the return to a monthly edition. Both are owed to Pierre Meindre who took over as chief editor on November 2007. At the same time he contributed to updating the Club web site and acted as webmaster.

Pierre is also a key publisher in the Letter. As Serge Lebel stated: "He travels, far away. He takes pictures! This makes him wearing four hats... At the Parisien (libéré) I had three as an editor, a photographer and a reporter. I was 90% of my time on the road. I could not have done more. Pierre, c'est la force tranquille. He is a precious friend from a technical as well as from a personal perspective".

The look and feel of the Letter owns much to Pierre's pictures thanks to his travels and to the many techniques he masters. More can still be seen on his personal web site [www.stereoscopie.fr](http://www.stereoscopie.fr).

Pierre keeps a permanent watch on the Web. He drives technical sessions on new hardware and software. He not only keeps us up to date but he is also our best trouble shooter. He created dedicated pieces of software like myAlbum for PC, StereoMoviebuilder and, for smart phones, Base-Calc, Stereoscope. He translated SPM into French etc.

Long life to the Letter and its chief editor, ready to welcome our articles and stereograms!

François Lagarde
