

This March issue is an impressive display of how activities related to stereoscopy can extend over a large variety of themes: drawing, travels, entertainment, design and manufacturing, biology, history and... weather.

The pictures reflect the Club past and present activities as well as those of other institutions. They show that stereoscopy has a long history and still a bright future.

List of content - Articles, Illustrations (most of them in stereo) & Hyperlinks
The page #'s refer to the original publication.
