

On this side of Pond (or the Channel) summer holidays are over. It is a time to recall May & June meetings, in France & Switzerland, before moving to what we call “La rentrée” (back to whatever activities we had dropped during July & August). Five meetings are already on the Stereo Club September agenda, four in Paris, one in Gabaret (Landes). Members will make various presentations like Pierre Joseph for the Heritage Days in St Dizier. As far as I can guess October agenda is already well booked.

An article on VR by our vice-chairman Patrick Demaret illustrates how stereoscopy is a gate to discoveries, the other is a brief on the long road to auto-stereoscopy. PaD is neither a professional photographer nor an engineer, he is a general practitioner, an enthusiast and a collector. He brings fresh opinions on issues which have been debated for years.

Last but not least: if you became an aficionado of this Letter you should read the introduction to the online index of our past Bulletins & Letters by our chairman François Lagarde.

Bonne rentrée !
