

In this issue you won't miss the invitation to the ISU World Congress 2019. Lübeck is a city close to the Baltic sea, member of the the Hanseatic League, definitely worth a trip to this part of Europe.

Do not miss either the reports on the exciting events which took place in Aude, Gironde (Bordeaux area) and Paris.

Looking at the dynamic trends in stereoscopy, our chairman François Lagarde & our watchman Pierre Meindre are helping us in taking the right turn into the new formats & equipments. From their point of view prof. Lomidze's opinion on the disappearance of 3D TV may come too late but does it actually? TV sets still account for about half of our familiar screens. Of course 4K and 8K are the big deals for this Christmas but can they do without 3D stereo in the future?

Last but not least, we pay a tribute to our friend Serge Gauthier. He made key contributions to the Stereoscopy World. Hopefully we will be able to publish again his 1990 treaty.

JYG (Member of the Board)
