

Dear Colleagues,

For the New Year, I am addressing you and your family my most sincere wishes, hoping 2019 will be rich in stereoscopic events.

In a world where 3D encompasses many techniques actually resulting in few products for the general public, our newsletter, our website, as well as the various meetings enable us to exchange, to stay up to date, to understand the trends, to master old and new techniques, to train ourselves with the main purpose of creating beautiful 3D stereoscopic images.

Let us share photos and videos during our Paris or our regional meetings, through publication in the newsletter or albums on the website, and last but not least through our links with national clubs thanks to the ISU (code name: CODE!).

Please come to our meetings for your images to be analysed, always from a constructive viewpoint ; send your best stereo views either to Pierre Meindre (for the newsletter bulletin@stereo-club.fr) or to Thierry Mercier for ISU (tmercier@club-internet.fr).

The Stereo club is also contributing to several photo events with 3D slide or video shows. Please refer to the calendar on the website for the latest information. Please take note of the dates and come! The more we attend these events, the better.

For the members who are far from Paris and regional groups, it should be easier to set up a screening session with our new projector (and its set of active glasses). Its size makes it easily transportable. It works well with a standard (non-polarised) screen for about 50 viewers.

The website was entirely redesigned to enable more flexible and fluid exchanges between members and the wide world. Changes will take place gradually. To start with members should check their personal data in the "Mon compte" (My Account) item. The website enables the creation of personal webpages. Other features are foreseen. But first please let us know your opinions and wishes.

Last and not least, the more you contribute to the Stereo club wide range of activities the better. If you have some spare time in an undoubtedly busy life please do not hesitate to contact me.

I wish you all an excellent year 2019. May stereoscopy bring joy and happiness in your life.

François Lagarde (Chairman)
