

## Editorial

Dear members,

You can now attend weekly meetings, regardless of your distance from Paris. These meetings take place by videoconference on Wednesdays starting at 7:00 p.m. French members outside Paris, Members from Switzerland, Greece and Quebec already attend these meetings.

Several groups were formed on the following themes:

- Collecting old devices,
- Collecting stereoscopic views,
- 2D / 3D conversion,
- Digitization / restoration,
- Aesthetics of still 3D images.

The attendants share opinions, ideas, documents related to the theme on the agenda. They sometimes extend the meeting on other subjects. Some members from the same geographical were not able to meet physically for a year. They truly appreciate these virtual meetings. These respond to a need for members to interact and to share, that we were unable to fulfill for over a year.

We are planning to set up other groups on themes like: Old techniques, Heritage and travels, 3D video. All members will be informed by email of the creation of a new group. After the first meeting, only registered members will be invited to the next.

If you want to join an already existing group, or to participate in a future group, please do not hesitate to contact me at [patrick.demaret@gmail.com](mailto:patrick.demaret@gmail.com).

The Chairman, Patrick Demaret

## List of content - Articles, Illustrations (most of them in stereo)

The page #'s is that of the original publication.
