

The Letter as usual? Not quite: to provide a better visibility to our members, all meetings (6 in May, 7 in June) are planned two months in advance; after several year of uncertainties the tax administration confirmed that the Club fees are NOT tax deductible but donations and non-refunded expenses are; on almost every page of the Letter you will find a link to additional information or interesting media accessible through the Club new Website (*image-en-relief.org*).

In this issue you will also find :

- the main conclusions of the Perspectives working group;
- a contribution from Catalonia, on how innovation in 2D cameras can steer innovation in stereoscopy;
- a technical article, more in line with our traditional activities “prismatic viewers have a future!”.

Pictures esp. blooming and budding trees from F.Lagarde are beautiful illustrations of an early Spring.
