

## **Editorial**

In 2020 a pandemic changed the world. It disrupted human relations, professional, social, educational and cultural activities. In France, for the first time in over seventy years, freedom of movement was restricted.

The French Stéréo-Club was unable to organise its weekly technical meetings or its monthly screening sessions. Photography fairs and exhibitions could not be held, depriving us of opportunities to meet with members and a wider audience.

Under the leadership of Pierre Meindre and thanks to the contributions of members, we were able to continue publishing our monthly newsletter, rich from many images and high level articles about stereoscopy.

Thanks to videoconferencing, we were able to run regular management meetings. It also enabled us to welcome new members, , wherever they were, with live audio and visual sessions.

The pandemic will not end before several months. We will have to take into account the ongoing "social barriers" and to look for new ways to meet and to present our images.

I hope that , in 2021, our Club will be able to resume all its previous activities.

My best Good Health wishes for you, your loved ones and the other persons around you. I hope that you will be able to dedicate some time to our common passion for 3DS images.

The chairman, Patrick Demaret

## List of content - Articles, Illustrations (most of them in stereo)

The page #'s is that of the original publication.
