

Editorial

The French Stéréo-Club general assembly usually takes place in early spring. Last year, due to the pandemic it was postponed to September.

The Administrative Board decided that, in 2021, it should be held again in early spring.

Travel and meeting conditions are still constrained by law. It should be held "behind closed doors", likely on May 29, 2021. Members will not be able to be physically present. Ballots will be collected by mail. The voting material should be received at the beginning of May. In person or anonymously, you will also be able to express yourself, to present your suggestions or to send any comments to the attention of the Administrative Board via a form attached to the voting material.

After this special GA, we will present the results of the ballots and a synthesis of your comments via a dedicated videoconference, open to all members.

We are hoping that many of you will take part in this important event, will give their opinion and make suggestions about how the Stereo Club should live and evolve.

The Chairman, Patrick Demaret

List of content - Articles, Illustrations (most of them in stereo)

The page #'s is that of the original publication.
